RV5-10 - Relief Valve

Spool, pilot operated 114 L/min (30 USgpm) • 350 bar (5000 psi)

Operation

When the inlet pressure exceeds the setting of the valve, the pilot section opens, causing a small flow across the orifice in the main spool. The subsequent pressure drop moves the spool against a light spring opening a ring of radial holes in the sleeve, allowing relief flow to tank.

Features

High accuracy of pilot operated design. Hardened working parts give long, reliable, trouble-free life. Cartridge construction for installation into your own manifold.

Performance Data

Ratings and Specifications				
Performance data is typical with fluid at 21,8 cSt (105	5 SUS) and 49° C (120° F)			
Typical application pressure (all ports)	350 bar (5000 psi)			
Cartridge fatigue pressure (infinite life)	350 bar (5000 psi)			
Rated flow	114 L/min (30 USgpm)			
Internal leakage, port 1 to port 2	114 cc/min (7cu in/min @ 350 bar (5000 psi)			
Cavity	C-10–2			
Standard housing materials	Aluminum or steel			
Temperature range	-40° to 120°C (-40° to 248°F)			
Fluids	All general purpose hydraulic fluids such as: MIL-H–5606, SAE 10, SAE 20, etc.			
Filtration	Cleanliness Code 18/16/13			
Weight cartridge only	0,22 kg (0.48 lbs)			
Seal kits – RV5	565803 Buna–N			
	566086 Viton°			
– RV5A	565806 Buna–N			
	889627 Viton*			

Viton is a registered trademark of E.I. DuPont
